# Philippines

**EBOOK DIRECTORY**

# Philippines' First & Only Public LoRaWAN® Connectivity for the Internet of Things

Packetworx is the country's pioneering IoT social enterprise—designing, developing, and manufacturing wireless, low-power IoT devices. As a LoRa Alliance® member, **Packetworx ensures global compatibility, offering a complete IoT solution:**

## packet**SENSE**

Durable, energy-efficient IoT devices for long-range data transmission.

## packet**NET**

Scalable LoRaWAN® network with 1,900+ base stations and 85% Metro Manila coverage.

## packet**VIEW**

Cloud platform for IoT data management and visualization.

## Where We Make an Impact

Smart City + Disaster Management

Smart Buildings + Industry

Smart Agriculture

Smart Utilities + Telcos

## Partners in Innovation

40+ local system integrators

10+ global partners

# Be ready **for anything** with Globe Business Solutions

Having a resilient business means being ready to handle unexpected problems, continue operations, and even find new changes for growth.

With Globe Business as your digital innovations partner, we are here to provide you with the solutions to thrive in today's market:

## Cloud

Improve efficiency throughout the organization by allowing secure access to corporate applications anytime and anywhere with our cloud solutions.

## Cybersecurity

Keep your business safe and earn your customers' trust with robust cybersecurity solutions.

## Connectivity

Reliable connectivity ensures seamless access to information and collaborative platforms, fostering continuous learning and agility.

Scan the QR code  
to get started.

# A WORLD LEADER IN SEMICONDUCTOR SOLUTIONS

## A leader in power systems

We are the clear no.1 in power semiconductors and a leading power systems innovator. Our silicon-, silicon-carbide-, and gallium-nitride-based power, driver, microcontroller, and software solutions are essential to take energy efficiency and green power to the next level.

## A leader in IoT

We are a leading one-stop technology partner for smart, energy efficient, and secure IoT solutions.

Our sensors, microcontrollers, and communication devices combined with security technologies and related software are indispensable in bringing the industrial and consumer IoT to life.

## Products and Services

Infineon is at the forefront of engineering excellence, delivering innovative semiconductor technologies that power the world's most advanced applications. With a relentless focus on quality, reliability, and cutting-edge performance, our products enable smarter, safer, and more efficient technologies across diverse industries.

# BROWAN Field Use Cases

# B·SAFE -Zone-Level Tracking Solution

## Airport Ground Handling

**Location:**  
Southeast Asia

**Client:**  
International Airport Operator

### Background & Challenges:

The airport required a real-time tracking solution for **personnel, baggage handling, and**

**maintenance equipment** across three terminals. Traditional GPS solutions **struggled indoors**, leading to **delays, inefficiencies, and security concerns**. A **scalable, infrastructure-free tracking solution** was needed to optimize ground handling operations.

### Solutions:

Browan deployed its **Zone-Level Tracking Solution**, utilizing **Wi-Fi and LoRaWAN®** for accurate indoor tracking **without additional infrastructure**. The solution integrates:

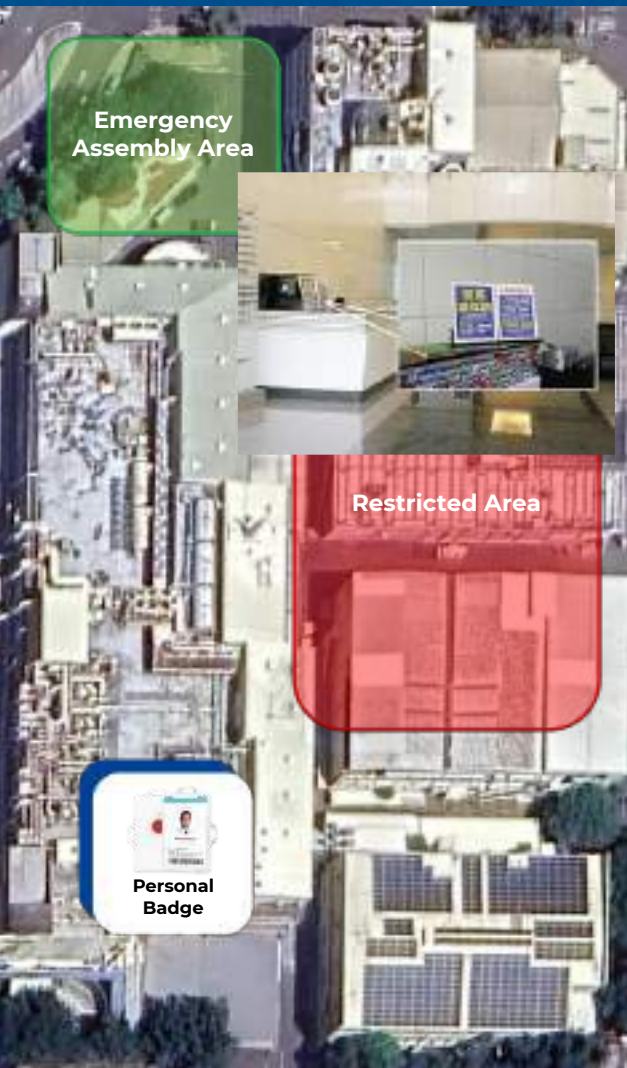

- **Positioning algorithm** inside **IoT devices and mobile phones**
- **Cloud-based SaaS platform** for data processing
- **Web dashboard & analytics** for real-time insights
- **Intelligent dispatch system** for optimized workforce allocation

**Coverage Area:** 1,153,312 square meters

**Tracked Objects:** 300+ mobile assets & personnel

**LR1110  
Tracker**

## Visitor Access Control & Emergency Evacuation

**Location:**  
Taiwan

**Client:**  
Leading semiconductor packaging manufacturer

### Background & Challenges:

Large industrial sites face complex challenges in managing visitor access and ensuring safety during emergencies. Without real-time visibility, it's difficult to locate visitors, enforce zone restrictions, or coordinate evacuations efficiently. Manual logs and traditional systems lack accuracy, slowing response times and increasing risk during critical situations.

### Solutions:

Browan deployed its **Zone-Level Tracking Solution**, providing real-time location tracking of all on-site visitors. By assigning smart tags upon entry, the system monitors movement across zones, restricts unauthorized access, and offers instant visibility during emergencies to support safe, efficient evacuations.

### Results & Benefits:

- **Improved Visitor Oversight** –Real-time tracking prevents unauthorized zone entry and enhances site control
- **Faster Emergency Response** –Live location data accelerates evacuation and improves safety coordination
- **Operational Transparency** –Centralized access logs support audits and compliance efforts

**ABOUT MILESIGHT**

Milesight offers multi-potential sensing products that accurately capture the most relevant and significant data for a growing variety of needs and applications.

Across AI, 5G, IoT, and other forward-thinking technologies, we innovatively extend the technological potential to unique niches and scenarios. With a keen perception of data value, we prioritize adaptive agility to quickly respond to customer-specific challenges and deliver safety, efficiency, and business insights.

In collaboration with a diverse partner ecosystem, we are committed to realizing data value and making real and positive impacts in the fields of smart building, intelligent traffic, intelligent security, smart city, and beyond.

# Murata

INNOVATOR IN ELECTRONICS

## Murata LoRa/LoRaWAN Modules

Bringing Long Range and Low Power Connectivity to your Smart IoT Devices and complement Short Range

Murata offers multiple LoRa/LoRaWAN module options, with or without an integrated microcontroller. We also provide additional geolocation features such as low-power GNSS, WiFi passive scanning, as well as the possibility to send data over Satellite NTN.

### Type 2GT

(LBAA0XV2GT-001) module is Murata's new generation LoRa® connectivity module. It provides multi-band LoRa and Long Range-Frequency Hopping Spread Spectrum (LR-FHSS) communication over sub-GHz and 2.4GHz ISM bands as well as satellite S-Band connectivity.

Merely 9.98 x 8.70 x 1.74 (max.) mm, it is one of the smallest LoRa® modules in the world.

• Radio Law certification has already been obtained for major regions.

### Type 2DT

(LBAA0XV2DT-158) module is LoRa Edge™ solution specially designed for Asset management using LoRa technology. This module offers ultra-low power design for long battery life, superior sensitivity and high flexibility to build low-cost Internet of Things (IoT) tracking devices for both indoor and outdoor environments.

• Radio Law certification has already been obtained for major regions.

### Type 1SJ

(LBAA0QB1SJ) module is one of the smallest LoRaWAN™ modules in the industry. This module has a lower power consumption and higher output than previous products.

• Radio Law certification has already been obtained for major regions.  
• Open MCU design support is available.

\*WiFi Non-Terrestrial Networks

### About Murata

Murata Manufacturing Co., Ltd. is a global leader in the design, manufacture, and sale of ceramic-based passive electronic components & solutions, as well as communication modules and power supply modules. Murata is committed to the development of advanced electronics materials and leading-edge, multi-functional, high-density modules. The company has employees and manufacturing facilities throughout the world. For more information, visit Murata's website at [www.murata.com](http://www.murata.com).

## ABOUT THE COMPANY

MultiTech designs, develops, and manufactures communications equipment for the industrial Internet of Things – connecting physical assets to business processes to deliver enhanced value. With a relentless focus on quality and innovation, MultiTech provides a wide range of reliable, high-performance products that help organizations worldwide achieve their IoT goals. At MultiTech, we simplify the Connected Product and Connected Service journey for OEM's, Service and Solutions Providers.

Our standard and customized wireless sensing and communications products use proven, standards-based technologies and open architectures, reducing time, effort and risk for our customers. MultiTech products are easy to integrate, easy to deploy and easy to scale, delivering best in class performance and value. We work closely with our customers, providing expert support, from architecture to integration and deployment.

Our U.S. and global manufacturing agility enables us to work in partnership with our customers at any volume. We deliver to your business requirements, from off-the-shelf to pre-configured product or fully customized solutions.

## PRODUCTS AND SERVICES

MultiTech is a leading manufacturer of end-to-end connectivity solutions, offering a comprehensive portfolio of fully certified external and embedded modems, routers, IoT gateways, and wireless sensors based on LoRa, Cellular, Private Cellular, and others. With on-site U.S. manufacturing and industry-leading technical support, MultiTech delivers reliable, high-quality products that empower businesses to seamlessly connect their devices and systems.

SDWAN Router, IPPBX and Antennas

### MULTIFUNCTION MIMO ANTENNA

Engineered for reliable M2M connections, wherever you need it.

#### FEATURES

- ▶ Compact low profile MIMO LTE antenna
- ▶ 1x or 2x2 MIMO dual-band WiFi
- ▶ Optional GNSS version available
- ▶ High performance in a distinctive design
- ▶ Covers all 2G/3G/4G/5G/LTE cellular band
- ▶ Dual-band 2.4/5GHz WiFi
- ▶ Weatherproof IP66 Certified design

### 4G/5G EASY-FIT ANTENNA

Compact, paddle-style antennas for 4G/5G routers. Easily mounted on device housings, panels, or windshields with an automotive-grade adhesive pad, they are ultra-wideband, ground plane independent, and support 617-900 / 1427-6000 MHz, covering 2G/3G/4G/5G globally. Built from weather-resistant plastic, they are ideal for portable and semi-ported applications.

#### FEATURES

- ▶ Compact Solution
- ▶ Multi-Purpose Antenna
- ▶ Cost-Effective Solution
- ▶ 4G/5G LTE Ready Covering 600-6000MHz
- ▶ Discrete Antenna for Mounting on Non-Conductive Surface
- ▶ Supplied with EN45545-2 Certified Cable

### BRACKET MOUNT 4G/5G ANTENNA

Experience stronger, smarter connectivity with the Piononoma 840E. Built tough and designed for LTE, M2M, and IoT, this cost-effective antenna boosts coverage across 2G, 3G, 4G, and 5G devices—keeping you reliably connected whenever you need it.

#### FEATURES

- ▶ Wall, Mast or Panel Mount Antenna Design
- ▶ Ultra-wideband Frequency Coverage
- ▶ Future Proof Antenna Solution Supporting all 4G/5G LTE bands worldwide
- ▶ Integrated Low Loss Cable
- ▶ 5dBi Peak Gain Performance
- ▶ UV Stable & IP Rated

## ABOUT THE COMPANY

Teachmint Inc. is a leading platform that empowers teachers, schools, and coaching institutes to create connected classrooms, seamlessly managing both online and offline learning environments. Our innovative solution equips educators with the tools they need to design engaging tests and quizzes, share study materials and homework, communicate directly with students, conduct live online classes, record lectures, and utilize a digital whiteboard. With features that automate attendance and enhance classroom management, Teachmint is transforming the educational experience. Since our inception, we have prioritized the highest standards of data security for our users. Our proprietary cloud-based SaaS solution, the Integrated School Platform (ISP), has enabled millions of educators to establish modern, 21st-century classrooms, making Teachmint a trusted name in the industry.

We have implemented a comprehensive system of security measures, including a Web Application Firewall (WAF), cloud protection, regular audits, data encryption, and role-based access control (RBAC). These safeguards ensure that user data remains secure and protected at all times.

With a strong user base of over 20 million across more than 50 countries and support for 17 languages, Teachmint is well-positioned for sustained growth and expansion. We are supported by reputable investors such as Rocketship.vc, Vulcan Capital, Goodwater Capital, Lightspeed, CM Ventures, and others, highlighting our stability and commitment to innovation.

In recognition of our excellence, Teachmint has received numerous awards and certifications, including Top Leader by G2, Top Performer by SourceForge, Top Leader by SoftwareSuggest, Most Transformational Company by GSV EdTech Company, Google Cloud Partner status, and ISO 27001 certification.

Partnering with Teachmint means joining a dynamic and forward-thinking company that is shaping the future of education. We invite you to be part of this exciting journey and leverage our platform to create impactful learning experiences worldwide.

## ABOUT THE COMPANY

Erovoutika Electronics, Robotics, and Automation is a respected and innovative company dedicated to advancing technology education and industrial solutions. Erovoutika has built a reputation for excellence through its commitment to quality, creativity, and global collaboration.

Our team is composed of highly skilled engineers and IT specialists with expertise in both hardware and software development, capable of delivering custom-designed robots, automation systems, and PCB solutions. We have successfully completed thousands of academic and industrial projects, and our products are recognized in both local and international competitions.

We are committed to empowering the next generation of innovators through world-class training, innovative tools, and strategic partnerships. With a strong curriculum, state-of-the-art robotics kits, and industry-standard designs, Erovoutika continues to shape the future of robotics and automation — from local roots to global heights.

## PRODUCTS AND SERVICES

Erovoutika offers innovative and high-quality solutions in the fields of Electronics, Robotics, and Automation and AI, catering to both educational and industrial needs. Our products and services include:

- Robotics Kits & Educational Tools – Complete learning kits from basic to advanced levels, including Arduino, Raspberry Pi, sensors, motors, and custom-designed robots like *E-Robot*, *EMegaSumo*, and *Erobo-X*.
- Automation Solutions – Design, development, and integration of automated systems for businesses and institutions.
- PCB Design & Fabrication – Customized printed circuit boards for academic projects, competitions, and industrial applications.
- Robotics & Automation Training – Structured curriculum (Level 1 to Level 20 in Robotics, Level 1 to Level 10 in Electronics & PCB Designing, Level 1 to Level 5 in Python Programming) for students, teachers, and professionals.
- Competition-Grade Robots – High-performance robots designed and tested for national and international competitions.
- Customized R&D Projects – Tailored electronics, robotics, and automation solutions for specific client needs.
- Certifications – Robotics and Automation Entry-Level Certification programs with successful passers worldwide, COMPTIA and ITS Certifications and trainings with CPD points
- Events & Competitions – Organization of robotics competitions such as *Robolution Regionals/Nationals/International*, workshops, trainings, and skill-share events in partnership with global institutions.
